

Sinclair Broadcasting's order to its stations to air an anti-Kerry program is an egregious and illegal abuse of the public airwaves. Sinclair uses those airwaves free of charge, and is legally bound to serve the public interest. Sinclair's action is also a predictable consequence of inadequate regulation that allows large corporations to control the airwaves - a clear indication that reforms are sorely needed. The company's offense needs to be prosecuted, and it must be taken into account in the license renewal process. Thank you.
